

```
cd /  
sudo mkdir ps
```

```
sudo su
```

```
sudo /usr/local/etc/emulab/mkextrafs.pl -f /ps  
sudo chmod 777 /ps
```

```
https://docs.docker.com/engine/install/ubuntu/
```

```
cd /etc/systemd/system/multi-user.target.wants
```

```
sudo vim docker.service
```

```
ExecStart=/usr/bin/dockerd --data-root=/ps/docker --storage-driver=overlay2
```

```
sudo systemctl daemon-reload
```

```
sudo systemctl restart docker
```

```
Docker Root Dir: /ps/docker
```

To start the server

```
sudo docker compose -f docker-compose.yml up --build
```
